

# SEVEN CUPS FINE TEAS

*Seven Cups Owner Zhuping Hodge visits the **Purple Bamboo Shoot** tea maker in China.*

An authentic, traditional Chinese teahouse, Seven Cups has been open since April 18, 2004. We offer high-quality, loose-leaf Chinese teas made to order, hot or iced, and a light sweet and savory snack menu.

All of our teas are produced using organic farming techniques. We work directly with their producers, traveling each year to supervise production conditions of the teas we source, in order to bring you the most sustainable and ethically produced tea in China. We frequently work with small family-held farms who may not be able to afford the cost of official certification, but who nonetheless practice sustainable and organic traditional farming methods.

New to tea? Looking for something specific? Want to try something different?

Let us know -- our teahouse team members are happy to offer a personalized recommendation.
